SUMMARY

- **8+ years experience** across software development, analytics, technical consulting, and project management.
- **Proven people leader**, managing high-performing teams of **5–10 developers**, improving operational efficiency and accelerating migration timelines.
- Strong expertise in **full-stack development** (Django, Flask, Streamlit, TypeScript, Flutter) and building **scalable automation solutions** that reduce manual effort and boost productivity.
- Balancing AI-driven efficiency with necessary human intuition to ensure that while LLMs accelerate development, architectural integrity remains robust.
- Claude Architect Foundation - Certified

CORE TECHNICAL SKILLS

- Education: MS in Operations Management, MS in Artificial Intelligence (Deep Learning)
- Programming Languages: Python, R, Typescript, Dart (Flutter), VBA
- Databases: Mongo DB, SQL, Postgres SQL, Redis
- Python-Specific Skills: Pandas, REST APIs, Django, Flask, Streamlit, Pydantic, FastAPI, PySpark
- ML Skills: Scikit-learn, PyTorch, TensorFlow, Computer Vision, Natural Language Processing
- AI: Generative AI, Large Language Models (LLM), Claude Code
- Cloud & DevOps: OpenShift, Harness, Lightspeed, Git, Github, Bitbucket, Jira
- AWS: Glue, SNS, SQS, Lambda, Athena, CloudWatch
- Operating Systems: Windows, Mac

PROFESSIONAL EXPERIENCE

Software Developer | Senior Consultant **Mar 2025 - Present**
First Derivatives, an EPAM company - Toronto, ON, Canada

- Developing and maintaining **backend solutions** for Citi's wholesale lending platforms, delivering scalable and secure solutions.
- Built **RESTful APIs and microservices** using FastAPI, Pydantic and Python, improving system performance.
- Optimized **MongoDB aggregation pipelines**, significantly reducing query latency.
- Designed and deployed billing and operational endpoints critical to Citi's workflow automation.
- Configured and maintained **Load Balancers, VIPs, (ALB & NLB) and WIPs**, ensuring high availability and reliable traffic distribution for critical applications.
- Monitored and validated **CI/CD** quality gates including **SonarQube, Lightspeed,** and **Harness**, ensuring code quality and successful promotion of releases.
- Troubleshoot deployment failures by analyzing **OpenShift** pods, container logs, and runtime issues, reducing deployment turnaround time and improving release reliability.
- Worked with **real-time streaming pipelines** with Kafka and Airflow for high-volume data ingestion.
- Built **TypeScript (Angular)** based frontend features that directly integrated with some of the backend solutions I worked with.
- Volunteered as a Backend Engineer on EPAM's internal AI platform a RAG-based prompt generation tool built around FastAPI, pgvector/SQL vector search, and LLM integration; contributed FastAPI services, and end-to-end observability and tracing using Langfuse.

Senior Software Developer - Integrations **Sep 2021 - Oct 2024**
Darwinbox, Mumbai, India

- Grew from Business Analyst (RPA) to Senior Software Developer, delivering automation, integration, and data migration solutions for enterprise HRMS implementations.
- Led a team of 5–10 Python developers and business analysts, managing task planning, code reviews, technical guidance, and project delivery. (Jira, Confluence, Git)
- Built web applications using Python, Django, Streamlit, MongoDB, and REST APIs to automate data migration, validation, and client onboarding processes.
- Created and deployed 100+ automation solutions using Python, Tkinter, PyInstaller, Selenium, and Pandas, replacing manual processes with reusable desktop applications and automated workflows.
- Designed and developed scalable ETL pipelines using Python, PySpark and AWS Glue, Lambda to process HR and payroll datasets from APIs, databases and SFTP sources into Amazon S3.
- Managed large-scale HR data migration projects involving datasets larger than 100 GB, including employee records, payroll data, organizational data, and document/image files.
- Integrated third-party and client APIs to automate data transfer processes and reduce manual data upload efforts.
- Worked directly with enterprise clients to gather requirements, design technical solutions, troubleshoot issues, and ensure successful project delivery.
- Contributed to architecture and design discussions for an internal AI-based technical documentation generator that analyzed source code using hosted AI models.

Data Analyst **Oct 2020 - Oct 2021**
Procter & Gamble, Mumbai, India

- Developed **Tableau and Power BI dashboards** for demand forecasting and inventory planning across product categories.
- Performed data processing tasks such as sorting, cleaning, modeling, and analyzing structured and unstructured data from **Oracle Business Intelligence**, which improved data accuracy and informed strategic decisions.
- Automated end-to-end reporting workflows using **Python** and **KNIME**, saving **1+ hour/day**.
- Designed a predictive **MIS reporting system** for women's hygiene products, adopted organization-wide.

Project Administrator **Jul 2019 - Jul 2020**
Bare International, Mumbai, India

- Managed customer experience projects across **15+ international markets**.
- Oversaw **1,200+ audit locations**, ensuring data accuracy and on-time delivery.
- Designed **SQL** and **Python ETL pipelines**, transforming raw audit data into actionable insights.

Research Analyst **Nov 2017 - Jun 2019**
Edge by Ascential , Mumbai, India

- Maintained a **global retail intelligence database** covering 188 markets and 155 cities.
- Analyzed retailer financials and macroeconomic data to produce performance forecasts.
- Automated forecasting workflows using **VBA macros**, reducing turnaround time by **40%**.
- Built **SQL-driven dashboards** in Looker for real-time stakeholder reporting.
- Collaborated with global teams across US, UK, and Germany.

EDUCATION

Master of Science in Artificial Intelligence - Deep Learning **2022 - 2024**
Assessed as equivalent to a Master's Degree in Canada by WES
NMIMS University, Mumbai, India

Masters in Management Studies - Operations Management **2014 - 2016**
Assessed as equivalent to a Master's Degree in Canada by WES
Vidyalankar Institute of Technology, University of Mumbai

Bachelor of Science **2010 - 2013**
Assessed as equivalent to a Bachelor's Degree in Canada by WES
Sathaye College, University of Mumbai

CERTIFICATIONS

- Claude Certified Architect - Foundations **2026**
- Career Essentials in GitHub Professional Certificate **2025**
- DAT207x: Analyzing and Visualizing Data with Power BI **2020**

Courses:

- Anthropic Certificate of Completion: AI Fluency Framework & Foundations **2026**
- Claude Code in Action **2026**
- Advanced NLP with Python for Machine Learning **2025**
- Deep Learning with PyTorch: Image Segmentation **2024**
- MongoDB CRUD Operations in Python **2023**
- Connecting to MongoDB in Python **2023**
- Python for Everybody, Specialization **2020**
- Excel VBA and Excel Macros **2020**

PROJECTS

- Position Estimation and Distance Measurement in 2D Space — AI Master's Dissertation
- Machine Learning Web App — Reduced food waste at Pfizer Mumbai cafeteria
- Football Analysis using Computer Vision — Computer vision and deep learning-based player and game analytics
- SaaS-style AI application featuring a chat assistant, code generator, CV/resume generator, and cover-letter creator
- Master's Thesis: Developed a mobile object detection application using MobileNet SSD, TensorFlow Lite, and Flutter.
- RAG Project: Built a RAG project to understand what actually happens behind the scenes.
